EDUCATION

B.Tech in Computer Science and Engineering (Data Science) Amity University Uttar Pradesh, Noida, Uttar Pradesh	CGPA: 8.3 / 10.0 June 2022 - Present
Class XII (Senior Secondary) New Yashoda Public School, Hisar, Haryana	Percentage: 73% May 2022
Class X (Secondary) OP Jindal Modern School, Hisar, Haryana	Percentage: 86.2% May 2020

SKILLS

Languages & Core CS: Python, Java, C++, OOP, DBMS, Operating Systems, Computer Networks

AI/ML & LLM Engineering: PyTorch, TensorFlow/Keras, LangChain, RAG Pipelines, Hybrid Search, FAISS, Transformers, LLM Integration, AI Workflow Orchestration

Data & Backend Technologies: Pandas, NumPy, MySQL, MongoDB, REST APIs, Streamlit, FastAPI (basic), JSON

Tools & Platforms: Git/GitHub, Google Colab, Power BI, Excel, Docker (basic)

PROFESSIONAL EXPERIENCE

Data Analyst Intern , Edulyt India – New Delhi, India	May 2025 – June 2025
- Analyzed multiple customer segmentation and banking transaction records using Python, MySQL, Excel and Power BI. - Derived actionable business insights and applied machine learning techniques to improve data processing workflows and predictive accuracy by 25%.	
AI/ML Intern , Edunet Foundation (in collaboration with AICTE & Shell)	July 2025
- Developed an end-to-end deep learning garbage classification system to categorize 6 distinct waste types using transfer learning. - Achieved 91% validation accuracy with EfficientNetV2B2, MobileNetV3Small, and ResNet50, and built an interactive Streamlit web app to automate real-time waste sorting predictions.	

PROJECTS

HEALBOT: Medical Intelligent Diagnosis and Q&A System PyTorch, LangChain, FAISS, OpenAI, Streamlit, FastAPI	
- Developed a bilingual multimodal healthcare AI system using EfficientNetV2-L + ConvNeXt-Base ensemble with Hybrid RAG (FAISS + BM25 + RRF), achieving 77.91% accuracy and 97.66% AUC-ROC while reducing LLM hallucinations. - Integrated LangChain-based retrieval workflows with prompt engineering, context management, vector search, and FastAPI-ready modular inference pipelines for scalable medical Q&A generation. - Deployed a Streamlit application with Explainable AI (XAI) overlays, Focal Loss-based imbalance handling, self-harm safety guardrails, and Google Maps API clinic routing.	
Stock Price Trend Forecaster Python, BiLSTM, Keras, Yahoo Finance API, Streamlit, Plotly	
- Built a deep learning-based stock forecasting system using stacked Bidirectional LSTM (BiLSTM) networks with technical indicators and multivariate time-series preprocessing for short-term trend prediction. - Engineered automated ETL-style data pipelines with Min-Max scaling, rolling windows, feature engineering, reusable preprocessing workflows, and RMSE-based model evaluation. - Developed an interactive Streamlit dashboard with Plotly visualizations, real-time prediction comparison, and REST-style prediction workflow design for future API integration.	

ACHIEVEMENTS

- Head of Promotions & General Management, CodeCampers Club (2023–24)
- Certificate of Appreciation, 14th International Conference on Cloud Computing & Data Science
- Participated in the Smart India Hackathon 2025, contributing to the development of an AI/ML-based solution for AI-Based Crop Recommendation for Farmers.
